PROFESSIONAL SUMMARY

Detail-oriented final-year B.Tech Computer Science student with a solid foundation in cybersecurity, software development, and machine learning, eager to contribute technical depth and problem-solving ability to a forward-thinking organization.

EDUCATION

B.Tech — Computer Science Engineering (Cybersecurity & Digital Forensics)

Expected October 2026

VIT Bhopal University, Madhya Pradesh

CGPA: 7.89

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Web & Backend Development: HTML, CSS, JavaScript, React.js, Node.js, REST APIs

Cybersecurity & Tools: Penetration Testing, Vulnerability Assessment, Wireshark, Nmap, Burp Suite, Metasploit, Kali Linux, VAPT, Linux, OSINT, TCP/IP, Firewall, IDS/IPS

Digital Forensics & Investigation: Mobile Forensics, Steganalysis, Cryptanalysis, Chain of Custody, Oxygen Forensic Detective, Cellebrite UFED, Magnet AXIOM, FTK Imager, StegHide, Hashcat, John the Ripper, Maltego, Shodan, theHarvester, IT Act 2000 / BNS / BNSS

Security Operations: SOC, SIEM Concepts, Incident Response, Threat Intelligence, OWASP Top 10, Log Analysis

ML & Data Science: Scikit-learn, Qiskit, Deep Q-Networks (DQN), Hyperparameter Tuning, Model Optimization

Developer Tools & Platforms: Git, GitHub, Linux, Windows, ShellGPT, Docker (basic)

CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

CERTIFICATIONS

Completed

- Cyber Security Analyst — IBM
- DevOps Fundamentals — IBM
- DevOps, Agile & Design Thinking — IBM
- Cyber Physical Systems — NPTEL
- Python Certification — Vityarthi
- Cybersecurity Practical Training & Certification — SmartKnower (Jan 2023 – Mar 2023): Hands-on exposure to Penetration Testing, Vulnerability Assessment, Network Traffic Analysis (Wireshark, Nmap) and Exploitation Frameworks (Burp Suite, Metasploit) through real-world scenarios.

In Progress

- Certified Ethical Hacker (CEH v13) — EC-Council

PROJECTS

Quantum-Enhanced Reinforcement Learning for Autonomous Cyber Defence

- Developed a hybrid Quantum-Classical Deep Q-Network (QDQN) for real-time threat detection and classification using Qiskit and reinforcement learning.
- Reduced threat classification time by ~30% vs. classical-only models; achieved ~50% improvement in detection accuracy over baseline models.
- Designed scalable multi-class threat classification architecture; evaluated quantum cost vs. performance trade-offs.

Advanced Network Intrusion Detection System (ML-Based)

- Built ML-based IDS using the NSL-KDD dataset for real-time threat detection across 5 classification models including Random Forest, SVM, and Neural Networks.
- Reduced false positives by ~40% through systematic hyperparameter tuning and model optimization techniques.
- Implemented a proactive alert system for continuous network monitoring and real-time anomaly notification.

Rule-Based Network Intrusion Detection System

- Developed a signature-based IDS with 50+ detection rules to monitor and flag suspicious network traffic in real time.
- Analysed historical attack patterns to iteratively improve rule accuracy, reducing false negatives by ~35%.

Phishing Link Detection System

- Designed a rule-based system to identify malicious URLs using heuristic filtering, achieving ~89% detection accuracy.
- Improved detection by layering URL structure analysis with domain reputation checks and pattern matching across 10,000+ URLs.

WORK EXPERIENCE

Cybersecurity & Digital Forensics Intern

Jun 2026 – Present

Delhi Police – IFSO (Intelligence Fusion & Strategic Operations), North District Cyber Cell

Internship, On-site

- Handled cybercrime cases — financial fraud, phishing, social engineering, identity theft — from complaint intake through forensic analysis and documentation.
- Performed mobile & storage forensics (Oxygen Forensic Detective, Cellebrite UFED, Magnet AXIOM) — imaging, hash verification (MD5/SHA-256), deleted/hidden data recovery.
- Applied steganalysis & cryptanalysis (StegHide, Hashcat, John the Ripper) to extract concealed data and crack encrypted evidence.
- Conducted OSINT-based suspect profiling & digital footprint tracing (Maltego, Shodan, theHarvester, Google Dorking) to generate leads.
- Maintained chain-of-custody & evidence documentation per IT Act 2000, BNS & BNSS.

Freelance Technical Consultant

Apr 2024 – May 2025

Celestial Sphere Mentoring

Part-time, Hybrid

- Designed and developed the company website from scratch using HTML, CSS, and JavaScript.
- Handled backend API integration, issue resolution, and system stability monitoring.
- Conducted security testing and vulnerability assessments on internal web systems.
- Automated repetitive operational tasks using ShellGPT, improving overall workflow efficiency.

Virtual Experience

Deloitte – Cyber Job Simulation | Forage

- Analyzed cybersecurity activity and logs to identify suspicious behavior and potential threats.

PwC – Cyber Security Consulting Simulation | Forage

- Performed risk assessment, SDLC walkthroughs and ITGC testing; summarized control gaps and exceptions.

KPMG Career Catalyst: Advisory | Forage

- Analyzed healthcare data and researched leading practices to develop data-driven initiatives.
