EDUCATION

B.Tech – Computer Science Engineering (Cybersecurity & Digital Forensics)
VIT Bhopal University

2022 – 2026
Madhya Pradesh

CERTIFICATIONS

Certified Ethical Hacker (CEH v13) – EC-Council
In Progress

Cyber Security Analyst – IBM
DevOps, Agile & Design Thinking – IBM

DevOps Fundamentals – IBM
Cyber Physical Systems – NPTEL

Agile Methodologies – IBM

Python Certification – Vityarthi

PROJECTS

Quantum-Enhanced Reinforcement Learning for Autonomous Cyber Defence

- Developed a hybrid Quantum-Classical Deep Q-Network (QDQN) for threat detection
- Integrated Qiskit with reinforcement learning for advanced cyber defense modeling
- Achieved ~50% improvement in detection accuracy over baseline models
- Designed scalable architecture for multi-class threat classification
- Evaluated trade-offs between quantum computational cost and performance

Advanced Network Intrusion Detection System (ML-Based)

- Built ML-based IDS using NSL-KDD dataset for real-time threat detection
- Reduced false positives through hyperparameter tuning and model optimization
- Implemented alert system for proactive network monitoring

Phishing Link Detection System

- Designed rule-based system to identify malicious URLs
- Improved detection accuracy using heuristic-based filtering techniques

Rule-Based Network Intrusion Detection System

- Developed signature-based IDS for monitoring suspicious traffic
- Analyzed attack patterns to improve detection rules

TECHNICAL SKILLS

Languages

Python, C++, Java, SQL, JavaScript, PHP

Frameworks/Libraries

TensorFlow, NumPy, Flask

Databases

MySQL, MongoDB

Tools

Git, Postman, REST APIs, Apache Tomcat

Cybersecurity

Penetration Testing, Network Security, Vulnerability Assessment, Ethical Hacking

Core Concepts

DSA, OS, DBMS, Machine Learning, AI in Security

INTERNSHIP EXPERIENCE

Cyber Security Engineer Intern

SmartKnower

01/2023 – 03/2023

- Performed vulnerability assessments and penetration testing on web applications
- Analyzed network traffic to detect anomalies and potential threats
- Applied ethical hacking techniques to strengthen system security
- Gained hands-on experience with real-world cybersecurity tools and methodologies

WORK EXPERIENCE

Technical Officer

04/2024 – 05/2025

Celestial Sphere Mentoring

- Built and maintained backend services using REST APIs, improving system responsiveness and reliability
- Applied penetration testing techniques to detect and mitigate vulnerabilities
- Leveraged AI tools (ShellGPT) to automate security analysis and testing workflows
- Managed technical operations, resolved system issues, and optimized performance to ensure seamless day-to-day functioning.
